

LitSense System Flow: From Story to Architecture

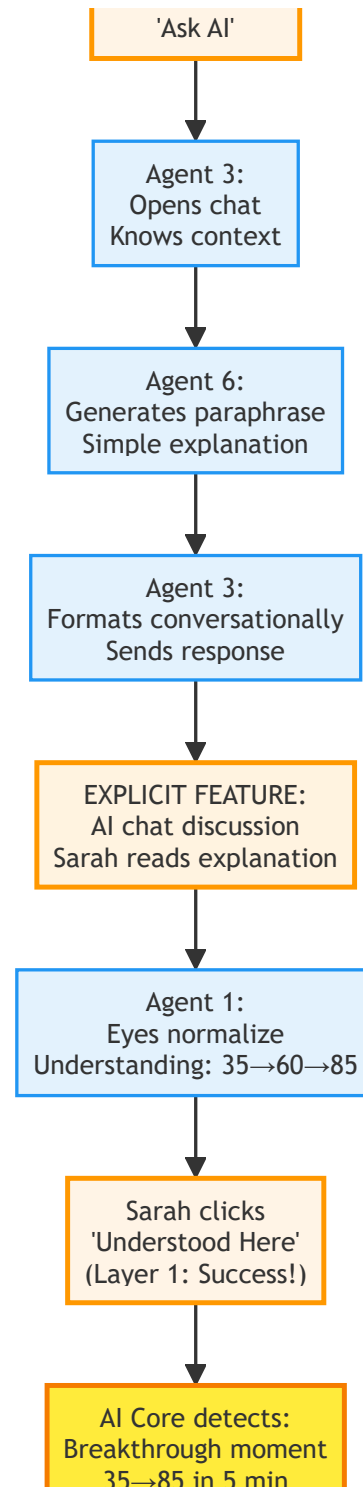

Visual diagrams showing how agents, features, and collaboration connect

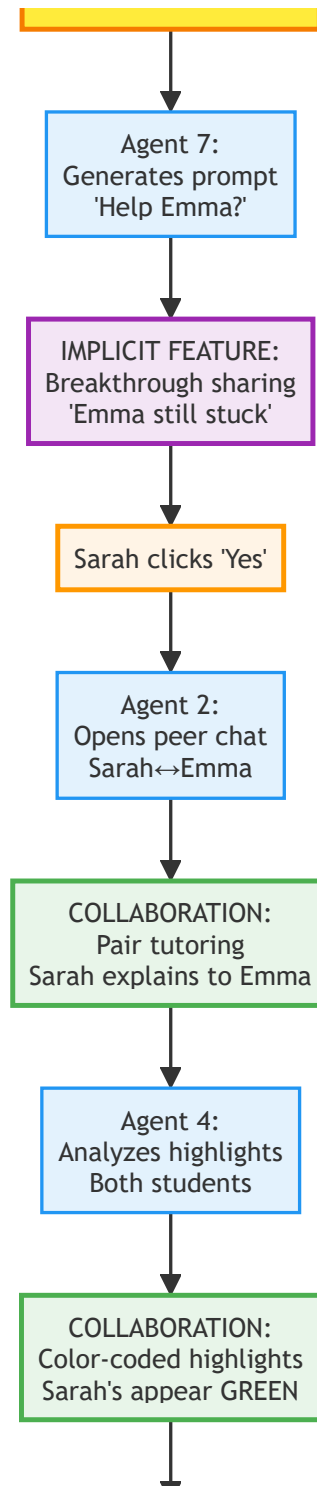

Diagram 1: Sarah's Journey Through the System

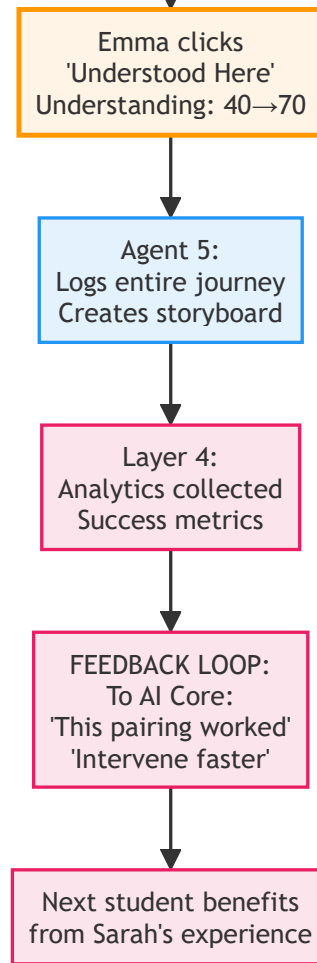

Following the story step-by-step: This shows exactly what happens from Sarah's struggle to successful collaboration, which agents activate when, and how features emerge.

 **User Actions** - What Sarah does

 **AI Agents** - System intelligence

 **Implicit Features** - Gentle nudges

 **Collaboration** - Peer interaction

 **System Learning** - Gets smarter

Diagram 2: How Agents Work Together

Multi-agent coordination: This shows how the AI Coordination Core orchestrates multiple agents to enable both implicit assistance and explicit collaboration.

Diagram 3: Three Paths to Collaboration

How collaboration emerges: This shows the three ways students end up collaborating - through implicit nudges, explicit AI help leading to peers, or direct peer connection.

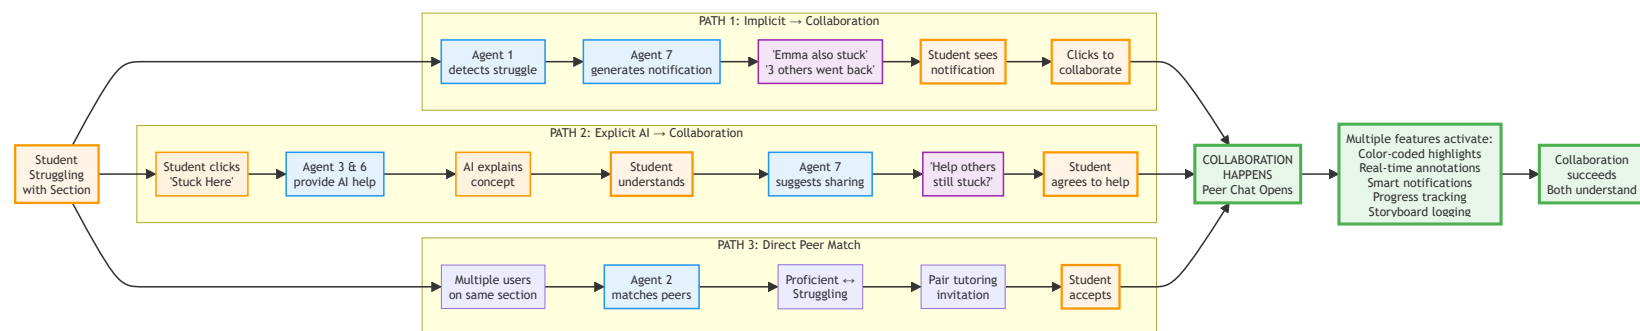

Diagram 4: How Features Connect and Build on Each Other

Feature ecosystem: This shows how individual features aren't isolated - they work together to create a complete collaborative experience.
